PRESS RELEASE FOR IMMEDIATE RELEASE

16 SEPTEMBER 2004

RICHEMONT ANNUAL GENERAL MEETING 2004

TRADING STATEMENT – COMMENT BY MR JOHANN RUPERT

Geneva, 16 September 2004

The Annual General Meeting of Compagnie Financière Richemont SA will be held later today in Geneva, Switzerland.

At that meeting, shareholders are expected to approve the proposals of the Board of Directors for the approval of the financial statements and appropriation of retained earnings. A dividend of € 0.40 per Richemont unit has been proposed, an increase of 25 per cent compared to the prior year. A further press release will be issued immediately after the meeting to confirm the decision.

At the meeting, Executive Chairman, Mr. Johann Rupert, will make the following statement in respect of Richemont's current trading performance:

Quote:

We indicated in this year's annual report that sales in the months of April and May this year had grown by twenty three per cent and twenty one per cent, respectively. That performance was, of course, measured against the low base seen last year as a result of SARS, which impacted the Asia-Pacific region.

As expected, the level of sales growth in the period from June to August has returned to more normal levels, reflecting the better performance seen in the comparative period last year. For the full five months from April to August, the Group's sales overall grew by fifteen per cent, at actual exchange rates.

During the five-month period we have seen sales growth of twelve per cent in Europe and thirteen per cent in the United States, again at actual exchange rates.

Sales growth in the Asia-Pacific region was very strong, as one would expect given the decline seen during the comparable period last year. Nevertheless, sales growth of thirty four per cent in the region for the period is most encouraging, more than making up for 2003's downturn.

In Japan, sales growth was four per cent for the period. We are seeing an improving situation for Cartier and the watch businesses there and one should not lose sight of the fact that Japanese domestic consumption is not yet benefiting fully from the improving economic situation in the country.

The strength of the euro, in particular against the dollar, has continued to impact on sales. At constant exchange rates, sales in the Asia-Pacific region would have been

forty one per cent above the prior year and in the United States, some twenty one per cent higher.

Sales of the Group's jewellery Maisons – Cartier and Van Cleef & Arpels – grew by twelve per cent during the period April to August. Cartier obviously continues to benefit from the introduction of its new jewellery and watch offerings, with the successful launch of the new Santos models and increased demand for the existing Santos collection.

The Group's specialist watchmakers enjoyed strong sales growth, reporting an increase of nineteen per cent for the five-month period. This obviously reflected the recovery compared to last year but also the strong underlying demand for their products and the continued international rollout of their businesses. This is a good result and the Maisons are growing their market share.

Our writing instrument manufacturers – Montblanc and Montegrappa - saw an increase in sales of eighteen per cent over the five months compared to 2003; again a good performance.

In terms of the Leather and Accessories Maisons, Alfred Dunhill has shown an improvement in sales, in line with our expectations, although – as anticipated - Lancel has felt the impact of the closure of its flagship 'Opéra' store in Paris for refurbishment. Both businesses continue to be monitored closely.

The market is undeniably stronger than at this time last year. However, in terms of the outlook for the remainder of the year, it is very difficult to make any concrete predictions. The sustainability of the economic recovery in the United States is still unclear and, although we are seeing growth, Europe is still a very sluggish market. Fortunately, we continue to see strong growth in the Asia-Pacific region and a gradual improvement in Japan.

The uplift that we have seen in the first few months of the year, particularly compared to the first quarter of last year, will result in significantly improved profitability for the Group in the first half of the year. As always, the coming months in the run-up to Christmas will be very important to the Group's full year results.

Unquote

Mr Rupert will also announce the appointment of Mr Norbert Platt as Group Chief Executive Officer of Richemont at the meeting.

Quote:

Upon becoming Chairman of Richemont I indicated to my colleagues that I would only hold the dual role of Executive Chairman and Chief Executive Officer until I could see that our performance had turned around.

We have now arrived at that point. Our balance sheet is in excellent shape, our cash flows are strong, and our Maisons are performing better and better.

I am please to advise that the Board yesterday appointed Mr Norbert Platt as Group Chief Executive. Mr Platt is currently Chief Executive of Montblanc, Richemont's principal luxury writing instruments business.

He is one of our most experienced and successful managers, having built Montblanc to its paramount position over the past 17 years. As Executive Chairman I will continue to work closely with Norbert and the executive team.

Mr Platt will be proposed for election to the board of Compagnie Financière Richemont SA at the 2005 Annual General Meeting.

Unquote

For its financial year ended 31 March 2004, Richemont reported a decrease in sales of 8 per cent to € 3 375 reflecting the strength of the euro, in particular against the US dollar and the yen, during the period and the difficulties experienced during the quarter-ended 30 June 2003 as a consequence of SARS and the decline in tourism stemming from both the epidemic and fears over of the war in Iraq. Notwithstanding the decline in sales, operating profit for the year to 31 March 2004 increased by 14 per cent to € 296 million, reflecting the reduction in the level of restructuring charges as well as lower operating expenses generally.

Richemont's interim results for the six-month period to 30 September 2004 will be released on Thursday, 18 November 2004.

Richemont owns a portfolio of leading international brands including Cartier, Van Cleef & Arpels, Alfred Dunhill, Montblanc and Lancel as well as the prestigious watch manufacturers Jaeger-LeCoultre, Piaget, Baume & Mercier, IWC, Vacheron Constantin, A. Lange & Söhne and Officine Panerai.

In addition to its luxury goods business, Richemont holds an 18.7 per cent interest in British American Tobacco.
